

HID® NCITE® Mobile Detective®

Mobile app empowering law enforcement officers to run criminal justice queries without the need to contact dispatch.

RUN A SEARCH USING:

- Driver's license number
- Plate number
- Person's last name, first name, and date of birth
- VIN (Vehicle Identification Number)
- Other information available in law enforcement databases

LOOK UP INFORMATION SUCH AS:

- Warrants
- Firearms
- Vehicle registrations
- Stolen property

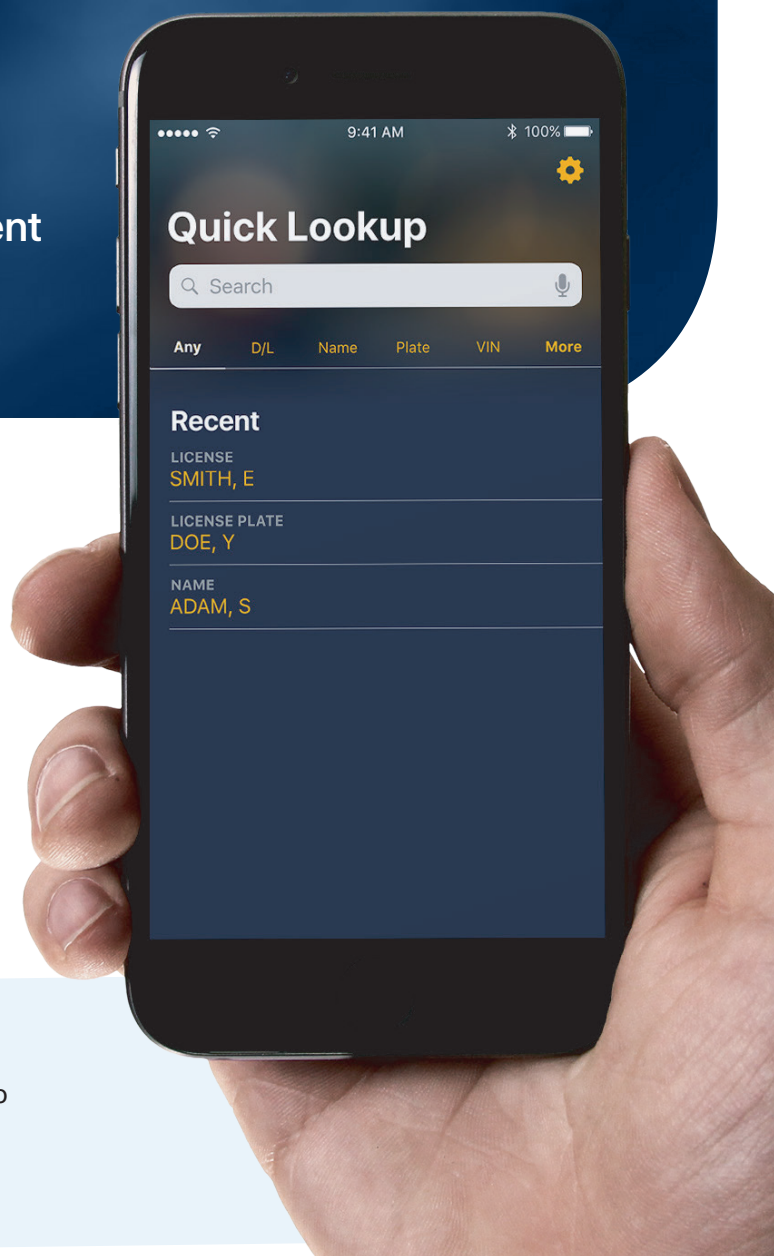

Search results include a driver's license picture (when provided by the state) allowing officers to easily identify persons of interest. Confirming identity is critical for officer safety in the field.

SECURITY

Developed with security in mind and adheres to the latest CJIS standards.

- Multi-factor authentication
- Encryption in transit and at rest

BENEFITS

Run queries anytime, anywhere

Query a wide variety of categories

Decrease workload on dispatchers

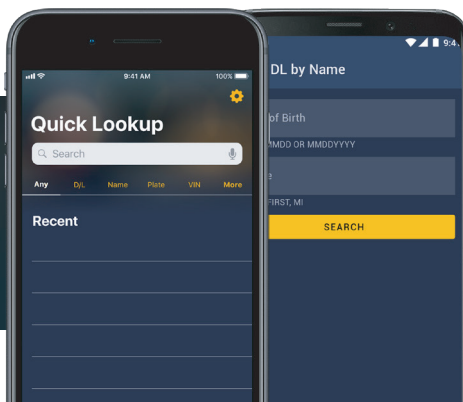

Receive rapid responses

Eliminate the need to return to a mobile data terminal (MDT)

Ideal for undercover law enforcement

AVAILABLE FOR iOS® AND ANDROID®
