

HID[®] NCITE[®] Visitor Management System for Government & Defense

Automated Visitor Registration and Vetting Designed to Streamline Workflow & Enhance Security

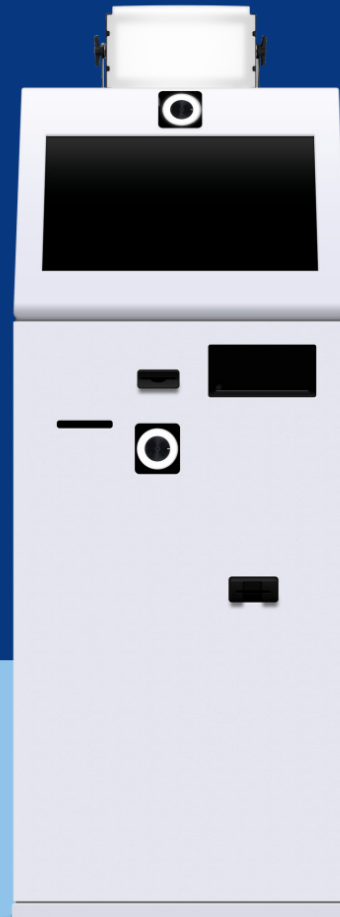

Exceptional Visitor Management for Highly Sensitive Environments

The HID NCITE Visitor Management System self-service kiosk and online registration portal, combined with the HID NCITE Vetting Service™, operates as an automated visitor registration and vetting solution that increases security and expedites throughput.

The solution streamlines manual processes and eliminates risks, such as:

- **Human Error & Security Gaps:** Relying solely on human eyes to detect forged IDs, altered documents or stolen credentials is irresponsible. There is too much room for error, as counterfeit identifications can often bypass visual inspection, jeopardizing the security of base personnel and sensitive areas.
- **Inefficient Procedures:** Manual verification involves physical checks and potential delays. This not only frustrates legitimate visitors but also creates bottlenecks and inefficiencies — especially in high-traffic environments.
- **Limited Auditability:** Manual processes lack detailed and accessible record-keeping capabilities.

Vet visitors efficiently and securely anytime background checks or enhanced ID verification is required.

Unparalleled Performance & Security for High Stakes Criminal History Vetting

Protecting highly sensitive government and defense facilities demands a visitor management system designed for efficiency and impenetrable security. The HID NCITE Visitor Management System delivers both.

This powerful tool, coupled with CJIS-compliant vetting processes, ensures every visitor undergoes rigorous background checks, ID document authentication and facial biometric matching — all within a secure environment.

Built for Specific, Mission-Critical Needs

The HID NCITE Visitor Management System boasts features specifically designed for these highly sensitive settings. Arm your team with cutting edge tools to deliver:

- **Unmatched ID Verification:** Eliminate the risk of fraudulent IDs with advanced document authentication and facial recognition.
- **Automated Background Checks:** Integrate with HID NCITE Vetting Service for rapid and comprehensive criminal history screening.
- **Streamlined Visitor Management:** Approximately 80% of visitor passes require no human intervention.
- **Visitor Sponsorship:** Empower sponsors to invite one or more visitors, delivering additional efficiency and oversight to the visitor registration process.
- **Web Registration Portal:** Allow visitors to register via a web portal and be “pre-vetted” before coming to the installation.
- **Comprehensive Reports:** Mitigate risks with detailed visitor tracking and audit trail reports.
- **Enhanced Facility Security:** Provide a state-of-the-art security solution across your sites to bolster access control.

Key Benefits

Enhanced Security	Improved Efficiency	Comprehensive Reporting
• ID authentication • Photo verification • Policy-driven automated criminal history screening	• Reduce visitor control center workload • Eliminate visitor waiting lines • Simplify sponsor tasks	• Instant data on all visitor registrations • Access denial reason tracking • Dashboards for leadership

Six Easy Steps

1

Register:

Visitor pre-registers online or goes directly to the self-service kiosk.

2

Verify Physical ID:

Scan ID at the kiosk to validate authenticity.

3

Enter Additional Information:

If the visitor didn't pre-register online.

4

Take a Photo:

Picture is taken at the kiosk to compare it with the ID photo or photo returned from the DMV.

5

Process/Resolve Discrepancy:

The system performs ID authentication, SSN verification (if provided), criminal background checks and photo verification. If a discrepancy is found during the checks, an agent will be engaged to resolve it.

6

Issue Visitor Credential:

A pass will be issued if all checks are cleared.

Enforce Cross-Checks and Visitor Engagement

Electronic Identity Verification

- State ID/driver license verification for authenticity
- SSN verification (when provided)
- DMV photo retrieval (when provided)

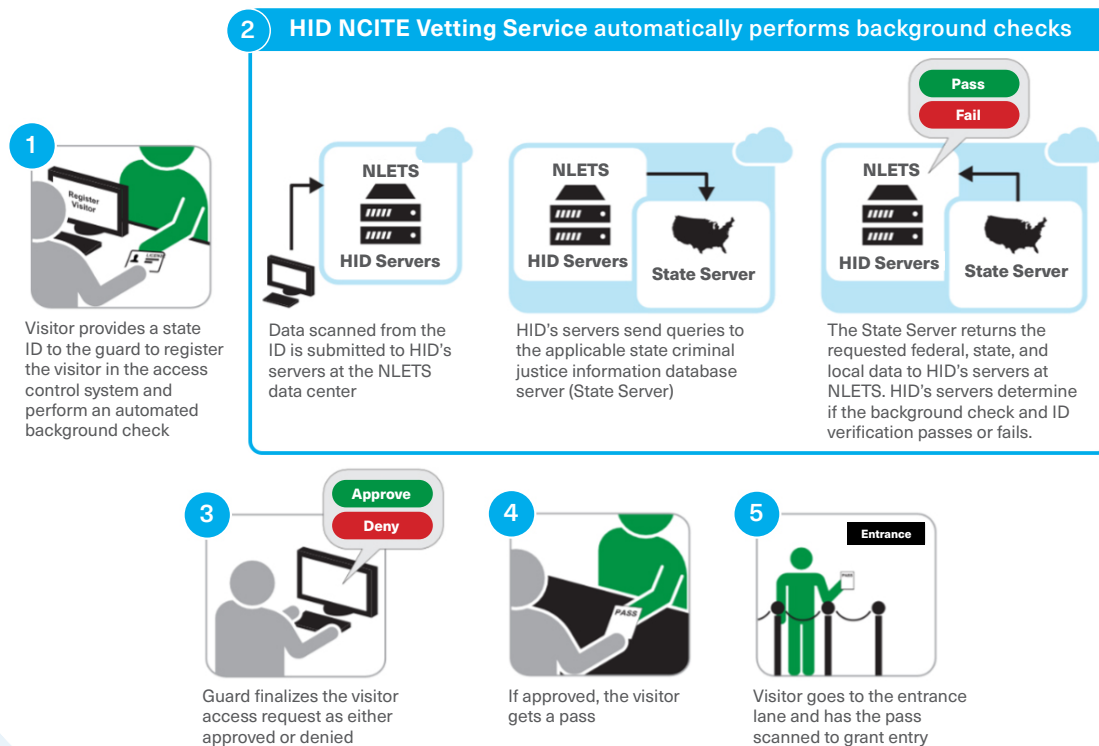

Automated Criminal Background Checks

- Criminal history data returned from state law enforcement databases and NCIC is compared to a list of agency-defined "hit" criteria

Efficient Engagements

- Customizable messages can be sent to pre-registered visitors to provide instructions based on approval or denial
- Real-time data provides greater visibility into your access control operations

How HID NCITE Vetting Service Works

NLETS Excellence

HID is a Strategic Partner of the National Law Enforcement Telecommunications System (NLETS)

NLETS is an organization owned by states that facilitate sharing of data from local, state and federal DMV and criminal justice information systems.

Our Strategic Partnership status enables HID to:

- More efficiently integrate with state criminal justice databases
- House HID servers at the NLETS data center
- Ensure compliance with the CJIS Security Policy by being subject to external audit

HID is approved to run the following checks on behalf of agencies:

- National Crime Information Center (NCIC)
- Interstate Identification Index (Criminal History)
- Department of Motor Vehicles (DMV) or equivalent
- State and local law enforcement database checks

HID – Your Partner for Trusted Identities

HID is extremely proud to support government and defense agencies with 30+ years of innovation and experience designing innovative biometric solutions. Your dedication to protecting our country drives our motivation to invent and continually evolve exceptional technologies. We work to enable government agencies to move faster, smarter and with the utmost confidence that they have the very best on hand when it comes to biometric identity tools.

Our trusted products and services are used by millions of people around the world to connect billions of things, delivering exceptional identity verification experiences and efficiencies across numerous use cases. There are countless considerations when it comes to selecting a technology partner. We consider it an honor to be part of your force.
