

HID® Livescan Adjustable Height Cabinet

Thoughtful design with flexibility and high reliability

The HID Livescan Adjustable Height Cabinet addresses customer's enrollment, booking and identity verification needs with improved ergonomics, added flexibility and an expanded feature set. The system accommodates all FBI certified forensic-quality HID L Scan™ palm scanners and HID Guardian™ 200 tenprint scanners.

Designed with law enforcement professionals in mind, the user control elements of the cabinet are arranged ergonomically. Capturing fingerprints, palm prints and textual data is an intuitive process that takes just a few moments. Through thoughtful design, the cabinet helps to streamline the criminal booking process and enhance officer safety.

The system includes an integrated flat-screen monitor with optional touch screen functionality. The large monitor conveniently adjusts for optimal viewing and

displays captured fingerprints in full resolution. Different monitor options are available, touch screen and rugged enclosure.

The cabinet is designed to provide ample workspace for documents or peripherals, such as signature capture solutions, bar code scanners or additional input devices.

Optional brackets are available to hold cameras and a bar code scanner. A flexible mounting bracket allows a user to permanently mount a device on either side of the monitor for a still camera for subject's photo and scar, mark and tattoo (SMT) or iris camera. A front bracket is available for a bar code scanner.

As a customizable system, the Adjustable Height Cabinet delivers value, ease of use and high reliability whether processing cooperative or uncooperative subjects.

KEY BENEFITS

- Easy electronic height adjustment using control buttons
- Ergonomically designed to meet the needs of law enforcement professionals
- Provides secure protection for scanner, keyboard and PC
- Secure with keyed lock
- User-friendly placement of control elements and consumable
- Durable, industrial-grade kiosk
