

HID® Livescan Universal Cabinet

Purpose-built livescan to meet your enrollment, booking and identity verification requirements

Fingerprinting suspects is a daily requirement for law enforcement personnel. It calls for rapid, high quality capture and biographical data input for quick identification and background checks through inquiries to local or remote Automated Biometric Identification System (ABIS) databases.

HID Livescan Universal Cabinet accommodates all FBI certified forensic-quality HID L Scan™ palm scanners and Guardian™ 200 tenprint scanners. All user control elements are arranged ergonomically to make the job of booking officers as easy and safe as possible. The large flat screen display with optional touch screen functionality is located in an optimal position and displays the captured fingerprints in full resolution.

The workspace surrounding the scanner provides additional area for

placing documents or connecting additional input devices, such as signature capture devices. Optional foot switch controls are conveniently located at both front corners.

Capturing all prints and textual data is an intuitive process that takes just a few minutes. The optional flexible mounting bracket allows convenient fixed installation of a device, either a still camera for subject's photo and scar, mark and tattoo (SMT) or an iris camera.

The HID Livescan Universal Cabinet was designed to deliver optimum performance and reliability in an easy to use configuration whether processing cooperative or uncooperative subjects.

KEY BENEFITS:

- Ergonomic design, tailored to the needs of booking officers
- Convenient layout of all user control elements and consumables
- Locked physical protection for scanner, monitor, keyboard and PC
- Long life, industrial-grade kiosk designed for harsh environments
- Optional left, right or both side mounting for camera(s)

HID Livescan Universal Cabinet

Access integrated components from front locking door

Optional camera can be mounted on either left or right side

Ergonomic design with ample space on desktop for documents
