

HID® NCITE® Visitor Management System

Automated Visitor Registration and Vetting for Government & Defense

The HID NCITE Visitor Management System consists of self-service kiosks and an online registration portal that empower U.S. government agencies to process visitors efficiently and securely when criminal background screening and/or ID verification is required.

The system can operate as a standalone solution or can be integrated with an existing access control system to automate traditional manual processes for registering and vetting visitors.

Legacy visitor management methods involve an attendant manually inspecting an ID, entering the ID information in the local visitor registration system software and then performing a background check on a computer terminal. The NCITE Visitor Management System automates the entire process resulting in approximately 80% of visitors receiving a pass quickly without human intervention.

The automated registration process involves the following steps:

1. Physical scan of the ID to verify authenticity, detect REAL ID compliance and extract key data to minimize manual data entry
2. Collection of additional data input by the visitor
3. Capturing an image of the visitor at the kiosk

4. Processing the data collected to include:

- Physical and electronic ID verification
- Facial biometric matching of the photo taken of the visitor to either the photo extracted off the ID or the photo retrieved from the Department of Motor Vehicles (DMV) or equivalent
- Automated criminal background screening

Working in conjunction with the HID NCITE Vetting Service™, the system provides the ability for government agencies to submit criminal history queries through federal, state and local law enforcement databases.

The NCITE Visitor Management System allows a user to self-register at a kiosk when on-site. It also provides the ability for visitors to register on a secure, encrypted website that enables them to submit visit requests prior to arriving at the facility or installation. This greatly reduces the chances of a visitor traveling to the installation and then being denied access upon arrival.

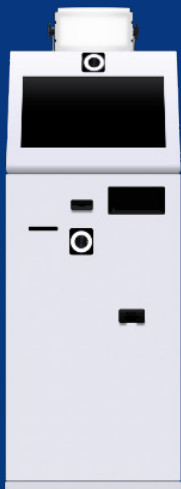

HID has over a decade of experience with criminal justice system automation and is a strategic partner of the National Law Enforcement Telecommunications System (NLETS), which helps ensure strict compliance with CJIS Security Policy.

KEY BENEFITS:

- **Accurate** — Biometric facial matching of the kiosk photo compared to visitor's state ID or passport (or image returned from the state DMV)
- **Fast** — Entire process takes less than two minutes
- **Efficient** — Approximately 80% of visitor passes require no human intervention, minimizing visitor traffic bottlenecks
- **Secure** — Physical ID authentication combined with electronic validation provide highest level of fraudulent ID detection
- **Data Rich** — Visitor registration data available instantly with tracking of reasons for denial and ability to create dashboards for leadership

HID NCITE Visitor Management System

KEY FEATURES:

- Rugged, enclosed self-service registration kiosk
- Privacy screen touch monitor
- High-security lock to prevent tampering
- Thermal printed passes with barcode for authentication
- Integrated cameras for badge photos and facial recognition
- Passport and card scanners for document verification

Product Name	HID NCITE Visitor Management System
Dimensions	26" L x 26" W x 80" H
Weight	200 lbs. (approx., without optional components)
Internet Connectivity	Wired or cellular connection
Power Supply	(2) 7 outlet power strips
Standard Components	• 22" touch monitor with privacy screen • State ID scanner • Passport scanner • Thermal paper printer • Integrated cameras (for facial recognition, top and wheelchair accessible) • LED top light
Optional Components	• Cellular antenna • Cradlepoint router • Firewall
Identity Proofing	• State-issued driver's licenses/identification cards • United States passports
NCIC/Interstate Identification Index	• Missing Person File • Foreign Fugitive File • Identity Theft File • Immigration Violator File • Protection Order File • Supervised Release File • Unidentified Person File • U.S. Secret Service Protective File • Gang File • Known or Appropriately Suspected Terrorist File • Wanted Person File • National Sex Offender Registry File • National Instant Criminal Background Check System (NICS) Denied Transaction File • Violent Person File

Data subject to change without notice.
