

Enterprise Passkey Management

Scale phishing-resistant authentication across your organization without adding complexity for IT and users

Enterprise Passkey Management (EPM) is designed to help organizations scale phishing-resistant authentication without increasing complexity. EPM enables enterprises to deploy and manage passkeys across complex environments — securely, efficiently and without placing extra burden on IT teams or end users.

Delivered as a platform-agnostic solution, EPM integrates with Microsoft Entra ID and other leading identity providers for streamlined passkey life cycle management, compliance assurance and a frictionless user experience.

ENHANCE CONTROL ACROSS USERS, DEVICES AND POLICIES

Core services include:

FIDO Provisioning

Reduce user onboarding time by 90% and accelerate passkey adoption with remote provisioning tools. IT administrators can create and register passkeys for users — individually or in bulk — before distribution. For high-volume issuance, EPM offers optional integration with FARGO printers.

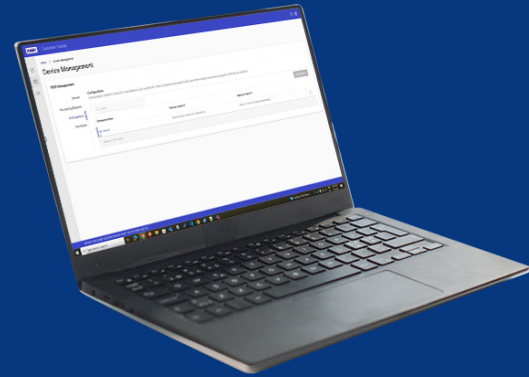

Device Unlock

Save up to 85% of helpdesk time and maintain credential relationships with HID's intuitive device unlock service. With this powerful service, IT administrators can authorize a user-initiated FIDO device PIN unlock — no factory resets, no credential loss, and no re-enrolment required. Users retain full control of the device and approve the reset locally, ensuring compliance with FIDO standards.

Life Cycle Management

Manage device-bound passkeys at scale while supporting compliance and operational efficiency. EPM's streamlined interface simplifies audits, enhances control and makes it easy for administrators to deliver an outstanding security experience.

Combined with [Crescendo Cards](#) and [Keys](#), [OMNIKEY smart card readers](#), and [FARGO card printers](#), HID's EPM is the only complete solution from a single vendor to create, manage and use FIDO credentials for both IT resources and physical building access.

KEY BENEFITS:

- **Secure:** Adopt passkeys with confidence, using enterprise-grade life cycle controls that aligning with compliance and security requirements from day one
- **Manage:** Provision, unlock and manage FIDO credentials at scale — without burdening IT teams, requiring individual user enrollment or manual setup
- **Integrate:** Connect seamlessly with identity platforms such as Microsoft Entra ID for streamlined provisioning and audit readiness
- **Scale:** Deploy across global, hybrid environments with support for diverse devices, form factors and workforce needs

	Enterprise Passkey Management Services	
	FIDO Provisioning	Device Unlock
Client Platform Support	Windows 11	Windows 11
Main Feature Set	• IT admin-led FIDO provisioning on behalf of end users • Crescendo Cards - Contact and Contactless supported • Crescendo Keys - USB and Contactless supported • Automatic randomized initial PIN • Streamlined user interface for passkey provisioning • FIDO device bulk provisioning via FARGO printers • FIDO device life cycle management	• User-initiated FIDO device PIN unlock
Supported Credentials	Smart cards and security keys: Crescendo Cards, Crescendo Keys	Crescendo 4000 Card Series
Third-Party Interoperability	Microsoft Entra ID, PingOne (coming soon)	Not applicable
