

GETTING STARTED WITH THE HID® FARGO® INK1000

Welcome to simple and efficient card printing with the HID® FARGO® INK1000!

Here are a few best practices to ensure long-lasting, high-quality cards:

Temperature
Cards print best at 65-80°F / 18-27°C

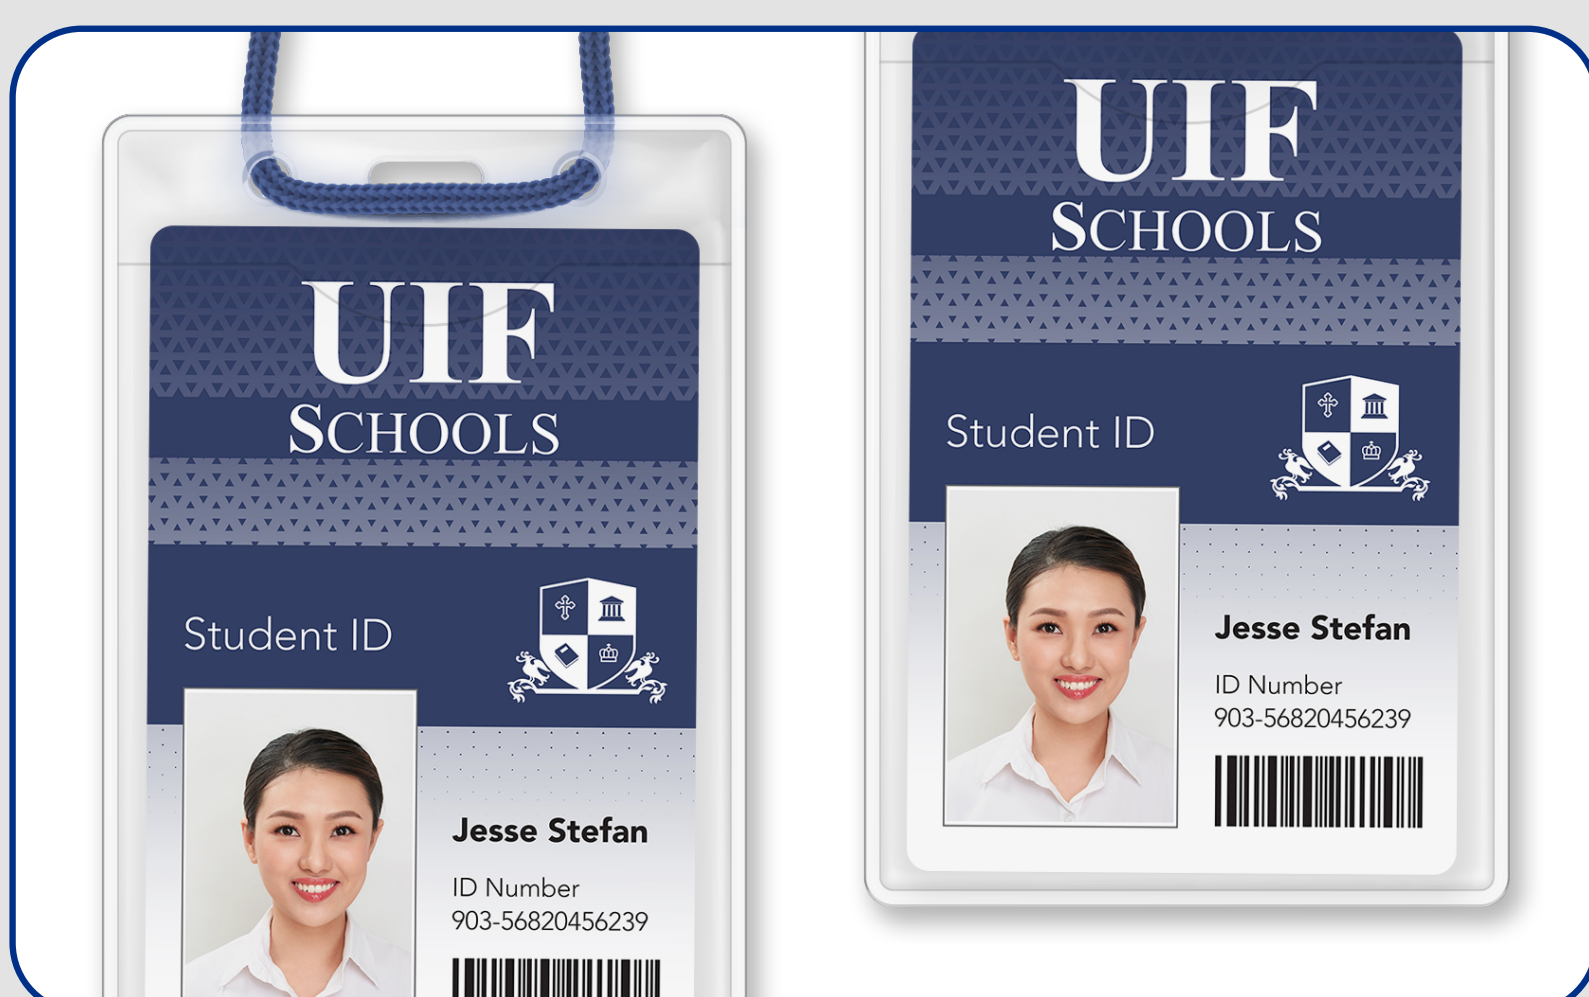

Background
For crisp images, keep headshot photo backgrounds light, but not white

Barcodes
Print barcodes in Premium mode for crisp and fine lines and edges

Moisture
Keep hands dry — moisture or residue from cleansers and sanitizers can cause ink to bleed

Card Holders
Use rigid plastic card holders to eliminate surface wear and tear
