

ActivID® Credential Management System (CMS)

HID Professional Services™ are sold and delivered through the HID Advantage Partner™ network, together with other Genuine HID® products and solutions.

Our goal is to deliver complete solutions that are fully operational and deployed according to best practices, on-schedule and on-budget.

BEST PRACTICE IMPLEMENTATION OF ACTIVID® CMS

- **Successful delivery** – HID Professional Services™ provides technical expertise and project management resources to assist in the planning and end-to-end implementation of HID Global's Identity Assurance solutions.
- **Enhanced customer experience** – You will receive personalized service from a dedicated HID Professional Services consultant, who will work with you to ensure best practice implementation and assist in training your team to effectively manage your new solution within your environment.
- **Increased cost efficiency** – HID Professional Services will assist in helping determine the requirements for your initial implementation and what can be deployed over time, enabling you to allocate resources and budget efficiently.

HID Global's ActivID CMS provides organizations comprehensive, highly configurable solutions to securely manage access to all their networks, PCs, in-house, public and private cloud applications, building facilities, and other resources.

HID Professional Services is committed to accelerating value and reducing business risk through the successful implementation of ActivID CMS. To maximize profitability, the team offers three levels of remote installation for the ActivID CMS, where each deployment includes:

- Installation and Configuration of ActivID CMS servers
- Card policy creation and configuration
- Hardware Security Module (HSM) Client Connection and Configuration, if required
- Connection and configuration assistance with a locally deployed Certificate Authority (CA). NOTE: Connection and configuration assistance with an external CA is available with the Enterprise Deployment Package
- A delivery of a custom Pre-requisite guide to prepare for the installation
- A delivery of a custom Installation and Configuration Guide outlining the customized installation procedure
- A custom Acceptance Test Plan to validate that the solution was deployed according to project requirements
- Ad hoc knowledge transfer
