

AssureID

Advanced Identity Verification Software for HID ATOM ID Document Readers

AssureID is advanced authentication software compatible with HID ATOM ID document readers.

Organizations can instantly verify identity documents, streamline customer onboarding, and protect against fraud — all with a fast, reliable and secure solution.

HOW IT WORKS

AssureID seamlessly integrates with HID ATOM readers to capture and analyze data from identity documents.

Using advanced OCR technology, the readers extract biographic information from IDs, driver's licenses and travel documents.

Over 50 forensic and biometric tests — driven by the industry's most extensive document library and human-assisted machine learning — are completed within seconds.

Multiple data elements, including MRZ, VIZ and biometric chip data are cross-checked to ensure maximum integrity and accuracy.

KEY BENEFITS:

- **Reduced risk:** Quickly detect fraudulent IDs and safeguard your business.
- **Achieve compliance:** Meet KYC, AML and other regulatory standards confidently.
- **Increase revenue:** Automate workflows to improve operational efficiency and boost conversion rates.
- **Secure data:** End-to-end encryption guarantees that no personal information is stored on devices or in the cloud.

RAPID PASS/FAIL AUTHENTICATION RESULTS

Images captured by ATOM are instantly analyzed by AssureID, providing clear pass/fail results on-screen for manual review. This fast authentication process significantly speeds up ID verification, minimizes manual errors and reduces employee training needs.
