

Asure ID Enterprise

Card Personalization Software

Asure ID Enterprise is a powerful card personalization solution designed for larger organizations, allowing multiple workstations to share a centralized database over a network. Its advanced, user-friendly design tools significantly accelerate the creation of card templates and the entry of cardholder data. With Asure ID Enterprise, everything you need to design and populate ID cards is at your fingertips — easily capture or upload photos and add digitized signatures with just a few clicks.

PRODUCTIVITY REDEFINED

Asure ID transforms the way ID card personalization software looks, feels and performs. With a user-friendly interface and intuitive workflows, designing ID card templates and entering data has never been easier. Everything you need — from design tools to database access — is presented in a crisp, clean workspace that lets users seamlessly move from data entry to design to printing and reporting.

EFFORTLESS, EVERYDAY USE

Routine tasks are streamlined to save time and reduce complexity. Whether you're capturing or uploading a photo, voiding a card or adjusting the print counter, it all happens in just a few clicks. Card data fields can be populated directly from the built-in Microsoft® Access® database or Live Link to a networked Microsoft® SQL Server®. These and other frequently used features are always at your fingertips — thanks to the Microsoft ribbon-style toolbar.

SMART, INTUITIVE AND READY WHEN YOU ARE

Asure ID enhances efficiency by automatically loading the last-used template and report at startup. It also offers advanced user-defined privileges, allowing administrators to control access to specific modules and templates.

FIND WHAT YOU NEED — FAST

With the optional **Quick Filter**, you can perform wildcard searches on any field in the database, saving time when every second counts.

Global Find extends this convenience across all databases and templates linked and managed with Asure ID.

CHOOSE YOUR SOURCE

Easily print ID cards using records from Asure ID's internal database, connecting directly to a local Microsoft® database with Live Link or utilizing the import/export wizard to import record data from Microsoft Excel®. Moreover, Asure ID Enterprise expands database connectivity and networking for enterprise-class card issuance with support for Microsoft and SQL® databases and ODBC import.

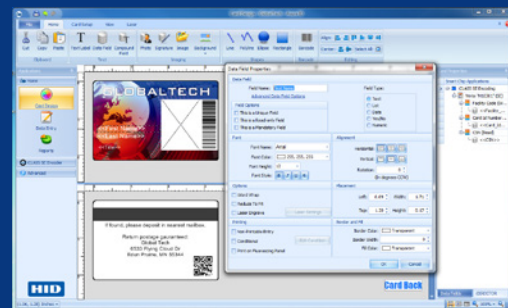

CUSTOMIZED REPORTING SECURELY DELIVERED

In addition to a range of ready-to-use reports, Asure ID Enterprise makes it easy to filter, sort and group data for customized reporting. Creating and saving personalized reports is straightforward, and configurable reporting privileges — along with application-wide password protection — help safeguard your ID data.

FUTURE-READY FLEXIBILITY

As your needs evolve, Asure ID evolves with you. Easily upgrade to the more advanced Asure ID Exchange to unlock additional features and functionality.

Asure ID isn't just software. It's a smarter, faster way to get the job done.

KEY FEATURES:

- **Robust Reporting Suite** — Filter, sort and group data to build custom reports
- **Live Link real-time data exchange** — Quickly and easily print card data from external databases such as HR, security or ERP systems — or link photos directly from a local folder
- **Intuitive interface** — Enjoy a streamlined, user-friendly interface that simplifies photo ID card design and data entry
- **Tabbed navigation** — Effectively multitask and effortlessly switch between card design and data entry — managing each independently
- **Pop-out control palettes** — Declutter the workspace by hiding colors and attributes until they're needed using pop-out control palettes
- **True-to-output preview** — See exactly how your ID card will print with real-time rendering of layout, images and data fields
- **Auto-update alerts** — Stay current with automatic notifications of free software updates

Asure ID Enterprise

ASURE ID MEETS THE CARD APPLICATION NEEDS OF:

- Large Corporations
- National ID Programs
- Government/ Military
- State & Local Government
- Healthcare
- Education
- Medium Businesses

PART OF A COMPLETE SOLUTION

Asure ID is a key component of a fully integrated HID ecosystem for secure ID issuance, management and authentication. Partner with your HID dealer to create a customized solution using trusted HID technologies, including:

- FARGO ID card printers/ encoders
- Cards, ribbons, films and overlaminates
- HID contact and contactless card readers

RECOMMENDED MINIMUM SYSTEM REQUIREMENTS

- 1 GHz or faster processor
- 1 GB RAM
- 1 GB available hard disk space
