

Easy, Secure Access For The Workforce and Consumers **From a Single Vendor**

Provide Exceptional User Experiences
Without Compromising on Security

End-to-End Security For Every User Journey

Your workforce and consumers may have different needs, but there is one big overlap: **the need for trusted identities to authenticate themselves and access applications as easily as possible – while keeping data and systems secure.**

The HID Authentication Platform, developed by a trusted industry leader in identity technology, offers a flexible suite of interlocking tools. It protects some of the world's most secure institutions while delivering exceptional user experiences

Meet Bette,
a soon-to-be customer
of KYC Bank Ltd.

Bette is looking for:

- An easy and convenient digital onboarding process
- Secure log-ins on the web or mobile app
- Seamless transaction signing
- Peace of mind that her account is protected from fraud

Meet Billie,
one of KYC Bank's IT
administrators.

Billie is looking for:

- Secure access to facilities and IT resources (like desktops and VPNs) without the need for multiple devices
- A choice of form factors and authentication methods to satisfy every preference
- Scalable flexibility and predictable pricing
- Peace of mind from a tested, easy-to-manage solution

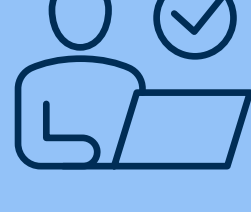

Has Them Both Covered.

Behavioral Intelligence-Powered Authentication for Consumers

HID gives Bette:

Easy account onboarding, using just her phone and a government-issued photo ID, powered by an intelligent and unobtrusive identity verification service

Hassle-free account access and transaction signing, from being immediately recognized as the true account holder

Confidence that no one else is posing as her, thanks to best-in-class threat detection and fraud protection

Multi-Factor Authentication (MFA) for the Workforce

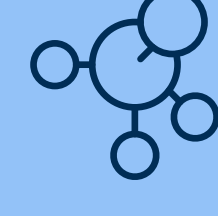

HID gives Billie:

Secure access to facilities and IT resources (like desktops and VPNs) without the need for multiple devices

A choice of form factors and authentication methods to satisfy every preference

Scalable flexibility and predictable pricing

Peace of mind from a tested, easy-to-manage solution

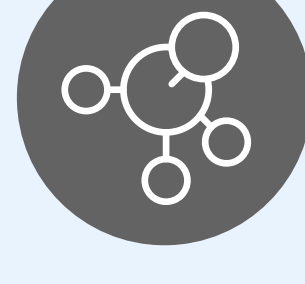

Ready for Simplified, Secure Authentication from a Single Source?

Check Out the HID Authentication
Platform If You Want:

More Choice

Through tailored workforce and consumer user journeys integrating passwordless, phishing-resistant or traditional MFA

More Flexibility

Based on open standards, like FIDO2 and OpenID, that can be deployed in the cloud or on-premises

More Security

Certified and aligned to the highest standards, including SOC2 Type 2, CJIS, ISO 27018, PSD2 and NIST
