

RAIN® RFID (UHF) Stationary Reader

HID® Acura RFID Readers

ACURA is the pioneer in the Radio Frequency Identification (RFID) market in Brazil and Latin America, and has been successful since the end of the 1990s in its wide-ranging adoption in the most diverse sectors of the economy, from mining to steel, from agriculture to food processing, from logistics to retail, from transportation to the distribution chain, from access control to asset management.

HexaPad, AcuPad and AC-01 are compact reading devices for applications like retail checkout. Edge-30 readers are used for outdoor applications like parking access, Intelligent Transport Systems (ITS) like road tolling or logistics.

	A tabletop reader with UHF RFID technology developed with a Near Field antenna with a restricted reading field, suitable for checkout operations, in addition to having an integrated barcode reader that can be used in a simultaneous or separate reading of tags. It is a slim profile reader with a modern and elegant design.		A compact, discreet UHF RFID reader with two SMA outputs for external antennas. The reader, combined with the practicality of the USB connection as an HID Keyboard device, is a flexible solution for the most diverse retail, healthcare, industry, and logistics applications.		Highly versatile desktop reader that uses RFID technology and offers an array of impressive features. It operates in two modes: Autonomous Mode for automatic readings and Transparent Mode for software development and programming.	A high-performance UHF RFID reader for tag Reading, its main feature is to be used in vehicle access control operations.
