What's new

Date	Description	Revision
January 2026	Updated to support HID Linq Cloud version v1.4.0.	A.6

A complete list of revisions is available in [Revision history](#).

1.1 Scope

These release notes provide information on HID® Linq Cloud™ release 1.4.0.

HID Linq Cloud is an HID Origo™ based software service for centralized reader and configuration management. This cloud-based software is accessible for authorized users via a web browser and supports management of one or more HID Signo™ readers connected serially through a generic USB hub, or over OSDP V2 via HID controllers and SIO boards.

There are two main components in this release:

Component	Version
HID Linq Cloud (HID Origo Cloud based service)	1.4.0
HID Linq Gateway (installed on Windows OS)	2025.4.0.0

1.2 New features and enhancements

- Added the ability to connect HID Linq Gateway to HID Controllers across Virtual LAN
- Added the Activity Log viewer
- Added the HID Linq Virtual Assistant (Beta version)
- Added the Configuration Agent for decoding Configuration ID functionality
- Added a Help feature
- Added support for Transparent HID Signo Readers
