HID'S ADVANCED DIGITAL LINEN-MANAGEMENT PLATFORM PROVIDES REAL-TIME VISIBILITY INTO YOUR LINEN INVENTORY AND AVAILABILITY.

HID's ACUITY™ linen-management platform combines industry leading RFID technology (tags and stations), cloud software and integration services to enable laundry professionals to accurately track linens, uniforms, and other textile assets to improve inventory visibility, reduce shortages, and automate processes. Furthermore, it contributes to delivering on time and on budget without adding steps to the linen lifecycle process.

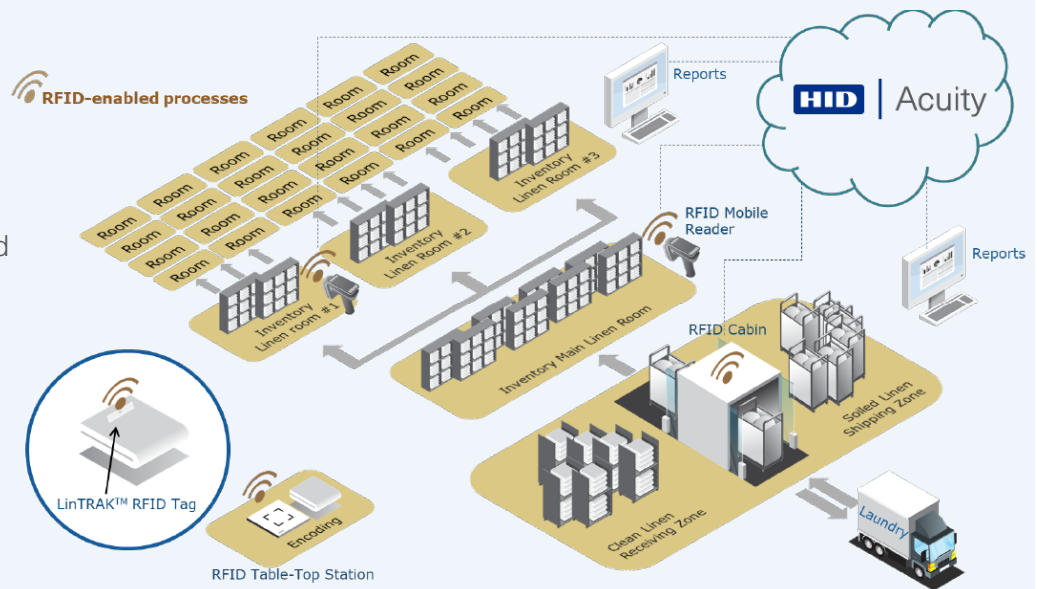

Benefits of the ACUITY linen-management platform:

- Rapid and accurate inventories in linen rooms
- Decreased labor and overtime costs, time savings
- Optimized linen rotations and dormant stocks
- Reduced linen PAR
- Reduced in linen losses
- Monitor linen quality and durability
- Controlled costs with laundry services

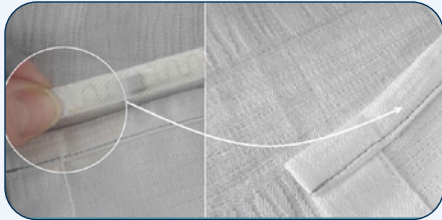

HOW IT WORKS

- Linen data are collected, stored, analyzed and acted on, in real-time, from the RFID-enabled equipment. ACUITY enables the transformation of the RFID data into rich, interactive, cloud-based dashboards and reports.
- The reports provide a comprehensive and real-time overview of linen stocks by article reference or individual items, per zones in your facility and at your laundry suppliers' sites.

Linen inventory distortion from out-of-stocks and overstocks costs the hospitality industry around the world hundreds of million dollars every year. The lack of linen inventory visibility results in:

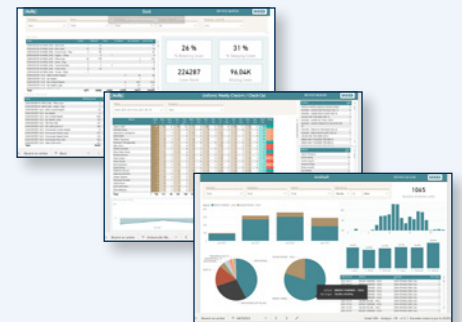

- Incorrect linen assortment planning and allocation
- Increased linen purchases and associated linen management costs
- Weakened housekeeping service quality
- Lost room sales
- A decline in customer satisfaction

LinTRAK™ UHF RFID tags insertion is automated during the textile items' manufacturing process.

Purpose-built, easy-to-install, mobile and fixed cloud-connected RFID stations identify linen items individually or in bulk quantities simultaneously.

Real-time centralized data in dashboard format reveals your stock levels, item rotation and room par level.

HID Textile Services has over 20 years expertise in RFID technology and a significant experience in linen/ garment identification and tracking over its entire use cycle from linen manufacturers to industrial laundries, the hospitality and healthcare industries. HID Global is an industry leader, reliable supplier of high-quality products with global support and a worldwide partner network.
