PACS POCKET GUIDE

HID Mobile Access®

Experience the ultimate in secure, convenient access control with HID Mobile Access.

Our wallet experience offers tap-and-go familiarity by adding HID credentials into HID app, digital wallets and mobile devices. Employees can use their smartphone or wearable to access offices, elevators, networks, printers and so much more.

Leveraging advanced Seos® credential technology and built-in device security features, wallet-enabled mobile access is a sustainable, high-security choice for future-facing organizations.

Did you know? HID also offers easy-to-deploy, app-based mobile access.

HID Signo[®] Readers

HID Signo Readers

— Now in White!

HID Signo Readers get organizations ready for the future, today. Showcasing a sleek, modern design and a slew of intuitive features, HID's signature line of readers deliver unrivaled security and performance.

Highly versatile, Signo readers natively support more than 15 credential technologies including HID Mobile Access via native Bluetooth® and Near Field Communication (NFC) capability. Signo readers also feature ultra secure storage of cryptographic keys on certified secure element hardware and out-of-the-box support for Open Supervised Device Protocol (OSDP).

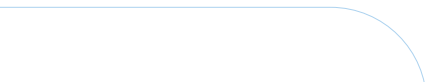

Available in black or white, with or without keypads, and with robust mechanical and high-security government-grade models, there's a Signo reader for every access control need.

HID Aero™ Controllers

HID Aero Controllers provide a complete and fully functional hardware, firmware, software library and tool infrastructure for access control software providers.

This product line is ideal for access control providers who do not want to incur the ongoing costs of designing, manufacturing and maintaining panel hardware along with the critical access control logic that commonly resides locally in access control panels.

Aero controllers feature open architecture to work with a variety of software partners without the need to re-invest in hardware. Highly trusted and reliable, this platform utilizes HID's best-of-breed technology, industry-tested for over 30 years.

HID Aero Controllers

HID Seos[®] Credentials

HID Seos[®] Credentials

HID Seos credential technology delivers the security, privacy and flexibility required to meet the needs of a modern world.

Every Seos-enabled credential — from eco-friendly bamboo cards to plastic clamshells and fobs to always-on-hand mobile apps — is supported by Secure Identity Object[™] (SIO) multi-layered security and modern cryptography.

Designed to work with a wide range of access control systems and applications, Seos makes it easy to successfully migrate away from insecure legacy technology, on your timeline. You can also easily extend to applications beyond physical access control, including secure printing, time and attendance, cashless vending and network log-ins.

HID is proud to offer the world's most innovative, secure access control solutions — along with the largest global ecosystem of strategic partners to support our customers' needs now and well into the future.
