

Overcoming the Challenges of Managing ID Card Issuance

Explore the industry’s first cloud-based, end-to-end solution that:

- Simplifies and streamlines the issuance of ID cards and other credentials
- Creates a new approach for ID issuance — replacing the old paradigm of standalone printers tied to a dedicated PC workstation
- Enables ID cards to be issued from anywhere and from any device via a web interface in a trusted environment

Has ID Card Issuance Been Marooned on a Desert Island?

Navigating your way through the complexities of ID card issuance can be a challenge, from ensuring the security of data to managing locally installed software on isolated workstations and keeping track of printer supply levels.

Legacy technology and disjointed processes can leave your ID card issuance office feeling isolated and asking if there is a smarter way to manage your ID card issuance.

Good news has arrived — there is a smarter way. HID’s innovative ID card issuance solution — HID® FARGO® Connect™ — helps you overcome these challenges to create a secure, integrated and centralized ID card issuance program.

SAVE TIME AND REDUCE OPERATING COSTS

Save time and reduce operating costs by gaining visibility and control of the issuance system with real-time monitoring that reduces human error and avoids costly downtime.

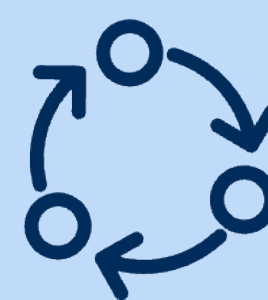

GAIN GLOBAL VISIBILITY AND INCREASE SECURITY

Achieve visibility of remote card issuance and exceed data privacy and security standards with state-of-the-art encryption and data storage management.

MAKE CARD ISSUANCE MORE CONVENIENT

Manage supply inventory and issue ID cards from any device or location. Our cloud-based platform unlocks centralized functionality that removes the dependency on legacy technology and isolated workstations.

STREAMLINE CARD ISSUANCE TO IMPROVE EFFICIENCY

Simplify your card issuance process into an easy-to-use, centralized solution that eliminates the need for different systems and applications — and provides new efficiencies through seamless automation.
