

Visitor Management

Benefits of Automated Visitor Management

- Streamlined process
- Enhanced screening capabilities for more effective security
- Reporting & Analysis
- Visitor log kept confidential

The professional approach to visitor management.

The approach to visitor management is changing and the demand for more professional, automated solutions is growing. Concerns about privacy and the perception of safety in the organization are also driving the need for a different approach. In addition, compliance and security mandates requiring audit trails or on-demand reporting are also driving more efficient methods to collect and distribute visitor data. For example, in emergency situations the ability to quickly and accurately account for all visitors on-site can be of great help to first responders.

Organizations of all sizes are realizing the benefits and the growing affordability of automated visitor management solutions. Automated solutions provide organizations with the tools they need to respond to emerging visitor management challenges. Today's automated visitor management provides a heightened sense of awareness and greater accountability by delivering the following:

- Enhances the professionalism of the enrollment process and visitor check-in
- Provides additional safeguards by screening against felony and sex offender watch lists if applicable
- Improves security by identifying who is in a facility quickly and accurately, especially in emergency situations
- Quickly and easily conduct analysis/reporting on visitor data, quickly and easily

HID Global, a trusted security industry leader has put its expertise behind visitor management. EasyLobby® visitor management systems meet the needs of small or large organizations by streamlining process and enhancing safety. Make visitor management a part of your access control strategy today.

Visitor Management Solutions from a source you trust.
