

Why Infant Security is a WISE INVESTMENT

Infant security is crucial for protecting vulnerable patients and maintaining the hospital's trust and reputation. Investing in strong security measures shows a commitment to providing a safe environment for newborns and their families, fostering trust in the hospital's care.

335

infant abductions have occurred between 1964 and 2021¹

of these incidents occurred in healthcare facilities

28K

babies per year (globally) are switched at birth due to errors or negligence in hospitals²

Protect infants at your healthcare facility. Partner with A GLOBAL RTLS EXPERT

Discover how integrating Real-Time Location Systems (RTLS) into a layered security strategy addresses critical challenges in healthcare. Read our white paper to implement proactive measures for staff and patient safety.
