

# Workforce Identity Management Solutions

Workforce Identity Management solutions solve numerous workforce authentication, visitor management and physical identity and access management challenges. All our solutions are available for use individually or as an end-to-end solution addressing a variety of use cases for medium-sized businesses, large enterprises, healthcare, aviation, governments, and financial institutions.

## **HID® SAFE™** **Physical Identity and Access Management**

HID SAFE simplifies workplace access, making it easy to manage the entire lifecycle of physical access identities and processes for everyone—employees, contractors and visitors—across all your facilities. HID SAFE Enterprise solves the key identity management challenges organizations face — onboarding and badging, visitor management, access management and compliance. With HID SAFE Enterprise, process managers in HR, IT, Facilities, Reception and Contractor Administration are enabled to effectively manage all their identity types. HID SAFE also offers additional machine learning solutions for Risk Analytics and Facility Analytics.

## **HID® WorkforceID™** **Cloud-Based Identity and Access Management**

WorkforceID digitally transforms the management of both cyber and physical access identities and credentials for the workplace — big or small. WorkforceID is different from other identity management platforms because it uniquely unifies both physical access identities and cyber/IT identities. Thanks to an ever-expanding set of workforce and visitor identity management applications, our customers are digitally transforming their cyber and physical security, compliance and business challenges. Plus, all this is possible without installing any software on-premise. Applications include Visitor Manager, Credential Manager, Authentication, Digital Credential Manager and Physical Access Orchestration.

## **HID® DigitalPersona® Advanced Multi-factor Authentication**

HID DigitalPersona's multi-factor authentication transforms the way IT executives protect the integrity of the digital organization by going beyond two-factor and multi-factor authentication. The DigitalPersona solution offers forward-thinking IT executives the ability to deploy the optimal set of authentication factors to provide users with a fast and secure Windows® Logon as well as VPN access, web, mobile and cloud applications.
